VIVOH
◀◀ ON ▶ TIME ▶▶
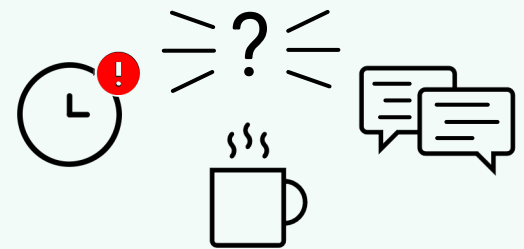

OnTime is a Meeting DVR that enables attendees to arrive late, pause meetings, catch up at 2X, and join without disruption

COMMON MEETING PROBLEMS SOLVED

- All meetings can now start on time
- Tardy attendees can catchup at 2X
- Allows attendees to take breaks without disruption
- Rewind meeting content that was hard to understand

PATENT PENDING ZERO-STORAGE ARCHITECTURE

- Prior to Vivoh, meeting DVRs and most streaming services stored files at rest
- Vivoh OnTime only keeps content from the meeting in memory
- Meeting content is removed after the session

INTUITIVE HOST AND PARTICIPANT EXPERIENCE

- The host starts Vivoh OnTime from their native meeting client with two clicks
- Users click a link in the meeting invite - Vivoh OnTime is 100% browser-based
- Live DVR navigation is the same as an archive, including 2X, pause, and rewind
- Once caught up, users join the meeting in progress with one click

ADDITIONAL BENEFITS

- Optional on premises buffer replication significantly reduces network impact of meetings
- New user metrics are available to measure engagement with the meeting content
